**§ 112 Claim Rejections**

The Examiner has entered several comments and objections to specific wording in certain claims. This response is submitted to revise the claims in a manner that overcomes each and every rejection under § 112. The claim revisions are made solely for the purposes of clarifying the claims in relation to the § 112 rejections. Specifically, the following changes have been made to overcome any § 112 rejection:

- a. Claim 1 has been amended to add the term "impeller". Therefore, it is submitted proper antecedent basis for that term exists in claim 7.
- b. The same change to Claim 1 resolves the antecedent basis issue of claim 16.

- c. Independent claim 1 has been amended to include the limitation (from claim 4) that the member is rotatable. Therefore, this concept is now clearly positively recited in the claim.
- d. Claim 50 has been revised to move the description of the "distribution void" to later in the claim to remedy any definiteness issue.
- e. The phrase "space" has been replaced with "distribution void" in claims 53, 61, 64, 72, 76, and 80 to resolve the antecedent basis issue.
- f. Independent claim 62 has been amended to transpose the language regarding the "distribution void" to later in the claim, to provide clarity and full support. Claim 64 has also been amended to substitute "space" with "distribution void" for antecedent basis purposes.

#### **§ 102 Rejections**

This rejection is respectfully traversed for the reasons expressed in Applicants' prior response, which is incorporated by reference herein. However, to advance prosecution of the present application, amendments have been made to the claims in a manner which is submitted to place them in allowable form, as described later in this response. It is therefore respectfully submitted that this rejection is moot in light of those claim amendments.

#### **§ 103 Rejections**
